

# TransitGateway

- Due Sep 24 at 11:59pm
- Points 25
- Questions 4
- Available Sep 17 at 12am - Sep 24 at 11:59pm
- Time Limit None
- Allowed Attempts 3

## Instructions

You work for a start-up company which has 3 departments: Marketing, R&D, and Supply. You are tasked to create a VPC for each department and a public subnet in each of the VPCs. At this point, each subnet only needs 1 EC2. All are in the same N. Virginia region.

The Marketing VPC:

Name: yourlastname\_marketing

CIDR: 10.10.0.0/16

The RND VPC:

Name: yourlastname\_rnd

CIDR: 10.11.0.0/16

The Supply VPC:

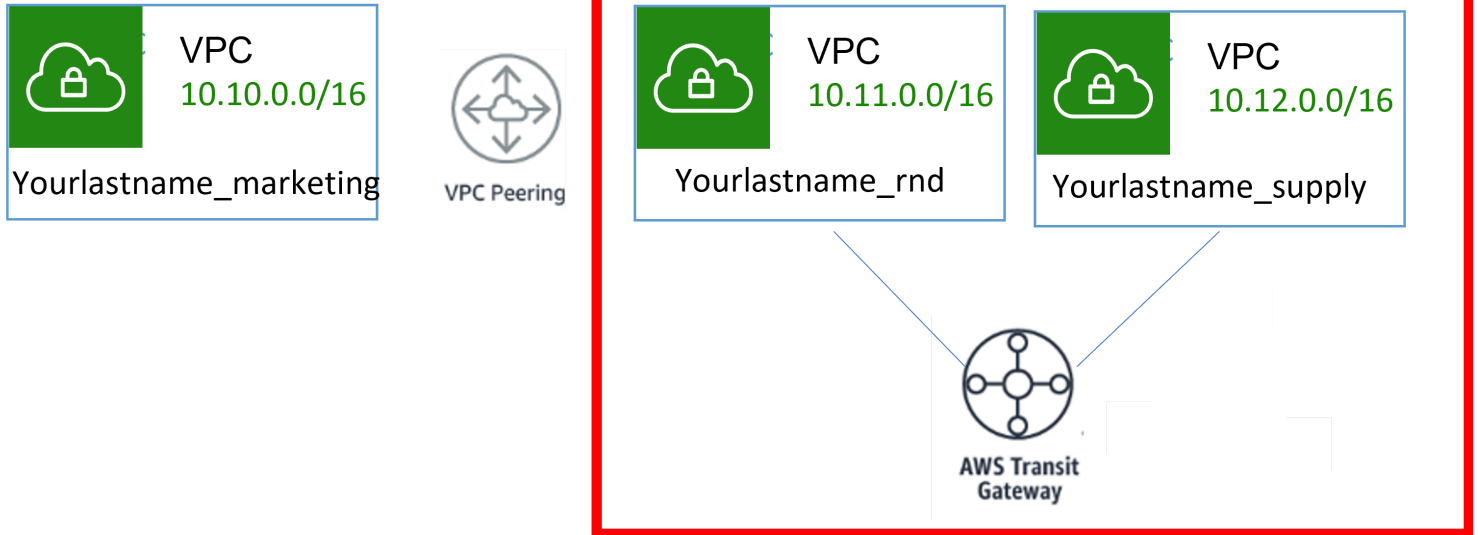

Name: yourlastname\_supply

CIDR: 10.12.0.0/16

The Marketing VPC is to be peered with the RND VPC. The RND VPC is to be connected with the Supply VPC using a Transit Gateway.

Name the Transit Gateway: yourlastname\_TG

Use CloudFormation to create the VPCs, subnets, EC2s and all other necessary components (internet gateway, security group, etc.). Each VPC stack must be named: yourlastname\_deptname\_VPC (for example: yourlastname\_marketing\_VPC and each EC2 stack must be named: yourlastname\_deptname\_EC2, for example: yourlastname\_marketing\_EC2.
